

350°F FABRIC BELT SPLICE KIT

Fusion Systems provides all the vulcanizing splice materials needed for a mid-heat resistant 175°C (350°F) non-peroxide-cured conveyor belt.

Fusion Systems experts have formulated these splice material compounds specifically for splicing, which means better adhesion and a better-quality, longer lasting splice. Fusion Splice Materials have been proven to work well with leading quality belt manufactures' belts for over a decade.

Buying a custom splice kit provides the following benefits:

- Price is comparable if not lower than most competitors,
- No wasted splice materials,
- No additional handling or transportation required when shipped to your shop or work site,
- No need to store and maintain splicing material inventory,
- No need to monitor splice material expiry.

These kits are customized-to-order specifically to your conveyor belt specification and splice requirements. The Fabric Belt Splice Kit is carefully packed and shipped directly to your work site, ready-for-use, with the details of the splice the kit handily marked on the crate exterior.

Please fill out the **Fabric Conveyor Belt Splice Kit Questionnaire** and our experts will customize your splice kit with all the necessary product mix and quantities, thicknesses and lengths needed for your conveyor belt and splice specifications.

Your Fabric Belt Splice Kit typically contains:

- AA-FBC Powder Blue Poly Cover Rubber
- AA-FBG Powder Poly Tie Gum
- AA-BFS Skimmed Breaker Fabric
- HC1 Vulcanizing Cement
- HFP Fabric Primer
- HST Splice Surface Prep
- Other items: Silicone Release Paper, Cure Card, Splice ID Labels, Cement brushes and Rags

Note: Actual contents will depend on your belt specifications and splice requirements. You may or may not require Belt Noodles, Edge Strips, etc.
