## Continuing Professional Development (CPD)

### Isopharm Training

A majority of our staff training is now provided on-line through Isopharm. They provide training specifically for dental surgeries. Their system provides the mandatory training we are obliged to complete as well as provide additional training to manage all aspects of the practice including Disinfection and Decontamination, Medical Emergencies, Radiography and Radiation Protection, Legal and Ethical, Complaints Handling, Oral Cancer - Early Detection, Safeguarding and Good Management Practices.

### General Dental Council (GDC)

The GDC require all clinical professionals to maintain certain minimum standards so that they can perform safely. This is monitored through Continuing Professional Development (CPD). A declaration is made each year before GDC registration. The CPD cycle is 5 years.

### British Dental Association (BDA)

The BDA offer practical guidance on standards required in dentistry and how these can be achieved. The practice is a member of the BDA.
