

The **wealthcare** experts

Headquartered in Hong Kong with presence in Singapore, Australia, Japan and India, Quantifeed is Asia's leading provider of digital wealth management solutions for financial institutions. Developed by a team with experience drawn from leading investment banks, Quantifeed's QEngine has been named Best Robo Advisor Solution by the prestigious Asian Private Banker magazine for three consecutive years. Its robo technology powers banks, insurers, brokers and wealth planners to provide simple, personalised, and engaging wealth management journeys. Combining software engineering and quantitative finance, we help transform financial institutions into providers of wealthcare, a customer-centric service focused on meeting everyone's wealth management needs. # Web Developer

**Location: Hong Kong**

## Responsibilities

1. Design, develop and maintain client-side (web based) software, in an Agile environment for the Wealth Management domain in the Financial industry
2. Maintain the existing code base: implement web interfaces, consume APIs, deliver functional requirements and document
3. Work with the established frameworks to on-board new Clients and Customers and represent the company in web requirement gathering and delivery discussions
4. Work cooperatively and productively with other Software Engineers and Management

## Requirements

1. Minimum 2-5 years of experience developing web applications
2. Up-to-date understanding of responsive web design, HTML, CSS, browser compatibility and web standards such as HTTPS and Restful APIs
3. Minimum 1-2 years of experience with Angular or other JavaScript MVC style frameworks like React, Ember or Knockout
4. Experience with TypeScript, Visual Studio Code and Microsoft Windows a plus as we use it heavily
5. Experience with ASP.NET, C# and IIS preferred, or other similar server-side MVC technologies like Node, Ruby, Java, or PHP can be considered
6. Experience with Azure and/or AWS cloud hosting preferred, mobile experience like Cordova preferred
7. Familiarity working in an Agile environment with unit/E2E tests, source control, code reviews and CI
8. An eye for design and UX, with attention to detail. Graphical skills a plus
9. An interest for problem solving, collaborating and delivering user-friendly software products
10. A knack for keeping things simple, elegant, organized, reliable, secure, well documented and on time
11. Strong communication skills and proven ability to work effectively within a small team of developers
12. Proactive attitude and willingness to learn new concepts, techniques and approaches
13. University degree in Information Technology/System, Computer Science/Engineering or related disciplines
14. Fluent in English with Mandarin and/or Cantonese a plus
