

T6GFXP CONTROL BOX

The T6GFXP features a long range wifi signal that will work with the Almexpad to manage and monitor pressure and temperature readings.

It's our safest ground fault control box yet, with ground fault protection internally and at all connection points. Any 25 milliamp leak and the power to that portion will shut off in 25 seconds; the power will auto shut off if it's not a well- connected and grounded connection.

FEATURES

- Wifi and ethernet connections
- 4.3" full color, touch screen display
- 4 thermocouple connections – 2 per platen
- Pressure sensors
- Read 3 phase currents for top and bottom platens and pump
- Run up to 8 boxes – 16 platens and maintains a temperature deviation max of 2.7°C
- Fuses are easily accessible
