

The **wealthcare** experts

Headquartered in Hong Kong with presence in Singapore, Australia, Japan and India, Quantifeed is Asia's leading provider of digital wealth management solutions for financial institutions. Developed by a team with experience drawn from leading investment banks, Quantifeed's QEngine has been named Best Robo Advisor Solution by the prestigious Asian Private Banker magazine for three consecutive years. Its robo technology powers banks, insurers, brokers and wealth planners to provide simple, personalised, and engaging wealth management journeys. Combining software engineering and quantitative finance, we help transform financial institutions into providers of wealthcare, a customer-centric service focused on meeting everyone's wealth management needs. ## Product Owner

**Location: Hong Kong**

### Responsibilities

- Engage in consulting exercises with clients to enable identifying their true needs.
- Align the needs of clients with existing platform features. Facilitate discussions with UI/UX Design teams, Engineering teams and Clients to solution gaps in capabilities into strategic re-usable solutions for the core platform.
- Lead the delivery of the platform to Client environments including managing stakeholder communications, status reporting, risks and scope.
- Organise feedback from clients and market analysis into a roadmap of features for the platform.
- Ownership of features from requirements elicitation and documentation through solutioning, testing and delivery.
- Learn and document product specifications and become a product SME over time.

### Requirements

- Minimum 5 years of experience in business analysis, project management and/or product management. Experience in financial services is highly valued.
- Strong facilitation skills for eliciting requirement and solutioning across multiple teams.
- Documentations skills with experience in writing user stories, business requirement documents and functional specifications documents with focus on content and aesthetics.
- Ownership of features from requirements elicitation and documentation through solutioning, testing and delivery.
- Strong relationship management skills; ability to effectively influence and lead multiple levels of organisation through functional boundaries.
- Ability to understand APIs, scripting and technical considerations. Hands on coding experience is preferred.
- Experience with Behaviour Driven Development and automation testing would be advantageous.
- Passionate problem solver with willingness to adapt and grow in a dynamic environment.
- Fluent in English. Cantonese and/or Mandarin desirable.
