QUANTIFEED
The wealthcare experts

Quantitative Solutions Analyst

Headquartered in Hong Kong with presence in Singapore, Australia, Japan and India, Quantifeed is Asia's leading provider of digital wealth management solutions for financial institutions. Developed by a team with experience drawn from leading investment banks, Quantifeed's QEngine has been named Best Robo Advisor Solution by the prestigious Asian Private Banker magazine for three consecutive years. Its robo technology powers banks, insurers, brokers and wealth planners to provide simple, personalised, and engaging wealth management journeys. Combining software engineering and quantitative finance, we help transform financial institutions into providers of wealthcare, a customer-centric service focused on meeting everyone's wealth management needs. As a quantitative solutions analyst your foundation in modern portfolio theory, experience with rules-driven strategies, accuracy and attention to detail, love of all things statistical and quantitative, as well as fluency in relevant programming languages leads you to success in this role. Flexibility, thirst to learn and love to work across different teams within the company are essential. Your work ranges from strategic asset allocation theory, instrument selection and trade optimization. To keep the engine running, you play a vital role in the maintenance and improvement of existing products and do not shy away from operational work. As a small company, we offer team members breadth of responsibilities and opportunities to influence.

Responsibilities

1. Data driven research, aided by familiarity with current academic research
2. Development and implementation of equity and multi-asset investment strategies
3. Prototyping software
4. Supporting operational workflows
5. Creating, calibrating and communicating investment strategies to marketing, sales, clients and the public

Requirements

1. Quantitative academic background with applications in finance. Experience in building statistical or financial models and strategies
2. Programming experience. Good knowledge of PowerShell, R or Python, or the willingness and ability to acquire
3. Some practical experience (1-3 years) in financial products and instruments, for example as a quant researcher or risk manager.
4. Languages: Fluency in English. Ability to communicate the basic idea behind any financial models / applications in simple terms to non-technical audience. Spoken Cantonese and/or Mandarin good to have.
