

HDS-MC

HYDRAULIC MULTI CYLINDER PRESS

Developed in collaboration with a European conveyor belt manufacturer, Almex's HDS-MC Series is one of the most advanced designs available for conveyor belt manufacturing. Multiple down stroking cylinders provide even pressure over the complete platen surface. Low operating costs and fast cycle times increase belt production and reduce product cost

SPECIFICATIONS

CAPACITY The HD-MC is offered in widths up to 3.2 M in width and 17 M length. Pressures of 500 psi (3.4 Mpa) are possible and 50mm belt

CONFIGURATIONS Both double or single daylight options are available. Complete turnkey lines with stretchers clamps and wind up and let offs

OPTIONS Steel Cable or Fabric conveyor belt production. Hot oil or steam heated platens.

FEATURES

- Multiple Cylinders eliminates the need for a bolster
- Uniform pressure even with different belt widths.
- Lifetime press frame warranty.
- Minimizes pit and foundation requirements
